

ZAIN UL ABIDIN

Full-Stack Software Engineer

Sahiwal, Pakistan | +923289237938 | zain.webdev86@gmail.com | linkedin.com/in/zainulabidin86 | github.com/zainWebDeveloper86 | buildwithzain.vercel.app

PROFILE

Final-year Computer Science student and full-stack developer with hands-on experience building production-style applications in React, Next.js, Node.js, and MongoDB. Comfortable working across the stack, from REST APIs and authentication to real-time features and deployment. Actively building with AI tools and workflows: developed an AI-powered forecasting feature using Python, FastAPI, and Meta's Prophet model, and regularly uses AI coding assistants (Claude, ChatGPT, DeepSeek) to learn faster and automate parts of the development process. Looking for a fullstack role where I can grow under mentorship while contributing to real-world, AI-driven products.

SKILLS

Frontend: React, Next.js, Redux Toolkit, JavaScript (ES6+), TypeScript, Tailwind CSS, Bootstrap, HTML5/CSS3

Backend: Node.js, Express.js, REST APIs, Python, FastAPI, PHP, JWT & OAuth authentication

Databases: MongoDB, PostgreSQL, MySQL, SQLite, Appwrite

AI & Automation: Prophet (time-series forecasting), Puppeteer (web scraping/automation), prompt engineering, Claude, ChatGPT, DeepSeek

DevOps & Tools: Docker, GitHub Actions, CI/CD, Kubernetes (learning), AWS, Vercel, Netlify, Railway, Git/GitHub, Postman, Socket.IO

EXPERIENCE

Fullstack Developer — Fellowship | DevWeekends

Jun 2026 – Present

- Built Sahiwal Electronics, a multi-vendor e-commerce platform, as the fellowship's primary full-stack project.
- Worked across frontend, backend, database design, and deployment, from user roles to real-time chat.
- Took part in engineering sessions and project reviews, receiving mentorship from experienced developers.

Frontend Developer Intern | Epicsols

Jul 2025 – Sep 2025

- Built responsive UIs for 2–3 major projects using HTML5, CSS3, JavaScript, and Bootstrap.
- Translated Figma designs into responsive, maintainable front-end code.
- Collaborated with senior developers to resolve technical challenges and ensure timely delivery.
- Learned production workflows and improved professional communication skills.

PROJECTS

SlabGuard — AI-Powered Electricity Slab & Bill Predictor

React · Tailwind CSS · Node.js · Express · MongoDB · Python · FastAPI · Prophet · Puppeteer · JWT

- Building an AI/ML feature that forecasts month-end electricity usage with the Prophet model to warn users before they cross MEPCO's tariff slab thresholds.
- Implemented a rule-based slab billing engine and an IoT usage pipeline (hourly ingestion → daily aggregation).
- Automated MEPCO bill-history collection with Puppeteer-based scraping.

Sahiwal Electronics — Multi-Vendor E-Commerce Platform

React · Redux Toolkit · Tailwind CSS · Node.js · Express · MongoDB · Socket.IO · JWT · Google OAuth

- Built a full multi-vendor marketplace with buyer, seller, and admin roles.
- Implemented real-time chat between buyers and sellers with Socket.IO.
- Set up JWT and Google OAuth authentication across the platform.

Contact Management App

React · Node.js · Express · MongoDB · JWT · Multer

- Developed a full-stack CRUD app with secure JWT authentication and protected, user-specific routes.
- Added search and pagination for fast lookup of large contact lists.

EDUCATION

Bachelor of Science in Computer Science | Arid Agriculture University, Pakistan

2023 – 2027

Currently in final year (8th semester)
