• Skills

- Frontend: HTML5, CSS3, JavaScript (ES6+), jQuery, React, Tailwind CSS, Bootstrap
- Back-End: Core PHP, NodeJS, Express
- Database: MongoDB, MySQL
- Tools Concepts: Git & GitHub, VS Code, REST APIs, Basic Authentication, Responsive Design, Form Validation

• Language

- English
- Urdu
- Punjabi

• Profile

A Computer Science student at Arid University with a self-taught foundation in full-stack web development. I have hands-on experience building responsive interfaces using Tailwind CSS, and React; and can connect them to a Node.js/Express backend with MongoDB for basic CRUD operations. Through several focused learning projects, I've gained practical exposure to API design, form validation, and database integration. Now seeking a structured mentorship program like Dev Weekends Summer Fellowship to transform my scattered knowledge into industry-ready engineering skills, with a strong interest in full-stack AI applications.

• Work Experience

- Self-taught full-stack learner with hands-on React, Node.js, and MongoDB projects.
- Seeking mentorship to build real-world AI apps.

• Projects

- Landing pages (Tailwind/Bootstrap), forms (JS/jQuery), portfolio PHP/MySQL
- React apps: forms, Todo & weather app
- MERN app: Contact App (CRUD, session auth)

• Education

- Bachelor of Computer Science (In Progress)
- Arid University Sahiwal Campus | Current Semester: Pass 7th
